Education

University of Virginia

Bachelor of Science in Computer Science and Economics

- **Relevant Coursework:** Data Structures and Algorithms, Calculus 3, Discrete Mathematics and Theory

August 2024 - May 2027

Charlottesville, VA

Northern Virginia Community College

Associate of Science in Engineering

- **GPA:** 3.9 of 4.0

August 2023 - May 2024

Anandale, VA

Experience

Pacific Northwest National Laboratory

Software Engineering Intern

- Developed a website for the Department of Energy to allocate funding to National Security Initiatives
- Decreased bundle size by 50% by implementing React code-splitting to optimize the user experience
- Implemented 10+ backend functions using Microsoft's .NET Framework

May 2024 - August 2024

Richland, Washington

AutoDog

Founder

- Developing a smart dog harness to boost efficiency of dog training
- Won 1st in Virginia and 3rd nationally for SkillsUSA Engineering and Design
- Used Bluetooth Low Energy, radio communication and various sensors to create a working prototype.

December 2023 - Present

Falls Church, Virginia

Kids Teach Tech

Lead Teacher

- Joined as 2nd member of a non-profit aimed at teaching coding to underprivileged kids
- Taught basic Python, Scratch and HTML to 500+ kids across the bay area
- Authored 12+ coding curriculum taught to over 2000+ students
- Led 30+ classes over zoom to team student across the country
- Met with 8+ foreign officials to explain the need for computer science education for youth

November 2017 - May 2020

Palo Alto, California

Gryphon Robotics

Programming Captain

- Led a team of 20 high school students in the fabrication of a custom robot to compete in the FIRST Robotics Competition
- Taught 15+ student how to program in Java

Sep 2021 - June 2023

Falls Church, Virginia

Jump Robotics

Co-founded

- After getting rejected from our school team, cofounded our own community robotics team as freshmen
- Learned CAD, robotics programming, and design

September 2019 - May 2022

Palo Alto, California

Projects

EcoCoin Developed a decentralised trading platform for tokenized emission allowances on the blockchain

October 2024

HealthScope Built a data platform using a custom neural network to visualize and predict public health trends

September 2024

DeepGuard Created a webserver to detect deepfakes using text, voice, and video using React and FastAPI

February 2024

MapMyStory Allows users to add a story on a map across the web with React and MongoDB

May 2024

Awards

Presidential Volunteer Service Award - Gold Volunteered for over 100 hours in 1 year with Kids Teach tech

October 2021

3rd Place for Best Use of Data at Johns Hopkins Hackathon Earned by developing HealthScope

September 2024

2nd place in schoolwide Science Fair Placed in science fair for researching propulsion efficiency of paddle boat

February 2022

3rd Place in National SkillsUSA Engineering Competition Created automatic dog harness to aid dog trainers

July 2024

Technical Skills

Programming Languages & Frameworks:

Java, Python, JavaScript, C#, TypeScript, Node.js, React, FastAPI, Django, Express.js, Flask

Tools & Platforms

Unity Game Engine, Blender, Microsoft Excel, Git, GitHub, and Google Cloud Platform

Specializations

Machine Learning (TensorFlow, Keras, Scikit-learn), Mobile Development (Android, iOS, Flutter)
