Dunn Loring, VA

☎ (315)-882-6569 ✉ nyanjprakash@gmail.com 🏠 nyanprakash.com 📱 Nyan-Prakash 🌐 nyan-prakash

Current computer science student at the University of Virginia with a proven track record in software engineering and education. At Pacific Northwest National Laboratory, enhanced web performance for the Department of Energy. Won a state competition with a smart dog harness called AutoDog. Led coding education for over 500 underprivileged kids and co-founded a successful robotics team. Looking to build cool things with cool people

Education

University of Virginia

Bachelor of Science in Computer Science

August 2024 - May 2027

Charlotte, VA

Northern Virginia Community College

Associate of Science in Engineering

August 2023 - May 2024

Anandale, VA

- **GPA:** 3.9 of 4.0
- **Relevant Coursework:** Object Oriented Programming, Calculus 2, Physics 1

Experience

Pacific Northwest National Laboratory

Software Engineering Intern

May 2024 - Present

Richland, Washington

- Developed a website for the Department of Energy to allocate funding to National Security Initiatives
- Decreased bundle size by 50% by implementing React code-splitting to optimize the user experience
- Implemented 10+ onion architectures functions using Microsoft's .NET Framework

AutoDog

Developer

December 2023 - Present

Falls Church, Virginia

- Developing a smart dog harness to boost efficiency of dog trainer
- Competed and won the state for SkillsUSA Engineering and Design
- Used Bluetooth Low Energy, radio communication and various sensors to create a working prototype.

Kids Teach Tech

Lead Teacher

November 2017 - May 2020

Palo Alto, California

- Joined as 2nd member of a non-profit aimed at teaching coding to underprivileged kids
- Taught basic Python, Scratch and HTML to 500+ kids across the bay area

Gryphon Robotics

Programming Captain

Sep 2021 - June 2023

Falls Church, Virginia

- Led a team of 20 high school students in the fabrication of a custom robot to compete in the FIRST Robotics Competition
- Taught 15+ student how to program in Java

Jump Robotics

Co-founded

September 2019 - May 2022

Palo Alto, California

- After getting rejected from our school team, 7 friends and I created our own robotics team
- Learned CAD, robotics programming, and design

Projects

Georgetown Hackathon Created a webpage to show emissions for 5 modes of transportation using API's on a map

January 2024

DeepGuard Created a webserver to detect deepfakes using text, voice, and video using React and FastAPI

February 2024

Carnegie Mellon Hackathon Fetched data from Google's API for an assistant for users with medical conditions

February 2025

MapMyStory Allows users to add a story on a map across the web with React and MongoDB

May 2024

Awards

Presidential Volunteer Service Award - Gold Volunteered for over 100 hours in 1 year with Kids Teach tech

October 2021

2nd Place in Science School Placed in schoolwide science fair for researching propulsion efficiency of paddle boat

February 2022

Technical Skills

Skills Java, Python, Machine Learning with Tensorflow, C#, and Reactjs

Tools Unity Game Engine, Blender, Microsoft Excel

Communication Extensive experience creating classes and public speaking
